

**Press Release|**  
**February 7, 2011**

Caledonia Care and Rehab (CCR) has been rated one of the best Nursing Homes in Minnesota in an article written by US NEWSs & World Report on Feb. 7, 2011.

More than 3.2 million Americans will spend at least part of 2011 in one of the nation's 16,000-plus nursing homes. How can those millions of people and their families find a source of good care? To ease the difficult search, U.S. News ranks and displays data about nearly every U.S. nursing facility and updates the information every quarter.

The U.S. News rankings rely on data from Nursing Home Compare, a consumer web site run by the federal Centers for Medicare and Medicaid Services. CMS sets and enforces standards for all nursing homes enrolled in Medicare or Medicaid.

The data for Nursing Home Compare come from regular health inspections carried out by state agencies and from the homes themselves. Using that information, CMS assigns an overall ratings of one to five stars to each nursing home, other than a small number too new to have generated meaningful data. Homes are also given one to five stars in how well they do in the health inspections, in providing enough nurses, and providing a high level of quality of care.
